

Sonic.net,Santa Rosa,CA, is my isp and might I add,very reputable, responsible, and extremely helpful. Their service is impeccable. I've used bigger isp's and they are not at all hands on. They make it very difficult to actually talk to a real live person. Please continue to regulate broadband service so that I will continue to be able to afford DSL with my local isp. Please don't wipe away the companies which built the Internet and replace them with large telephone monopolies.

Thank You.
